# ABOUT CSA

The Chinese Student Association (CSA) is one of the largest multicultural student associations at the Erasmus University Rotterdam. We strive to be the bridge between Chinese and internationally oriented students, professionals and companies.

Currently we have eleven departments: Career, Marketing, Partnership, Social, Cultural, Education, Study Trip, Alumni, Utrecht, IT, Internal. All of them strive to further meet our members' needs in both their cultural, academic and professional journey. Notably within the Career department, students in our network participate in an array of professional events that allow them to put their theoretical knowledge into practice, accumulating practical experience, as well as building up their network at the same time.

# OUR VISION & MISSION

---

## VISION

Our vision is to become a key bridge between companies and students, providing opportunities for meaningful collaboration and mutual growth. We aspire to cultivate leaders of tomorrow by offering resources and career pathways with companies. CSA aims to facilitate a deeper understanding of Chinese culture in the business world, while helping organizations tap into the talent, innovation and perspectives our members bring.

## MISSION

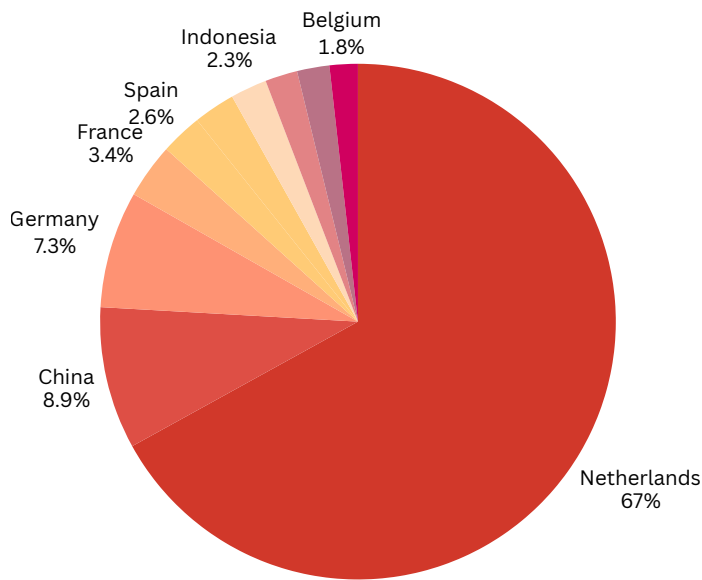

The Chinese Student Association is dedicated to fostering a supportive and inclusive community that promotes cultural exchange, professional development, and social connections among students. Our mission is to provide a platform for students of Chinese heritage and all those interested in Chinese culture to meet, share experiences, and grow collectively. Through cultural, academic, and career-focused programs, we aim to connect student life with professional development, helping members succeed academically during university and post-graduation.

# GENERAL MEMBER NETWORK

## CSA Members' Top Nationalities

### Growing Numbers

Our most updated general member database of the past five years accumulates **4200 members**. Last year we welcomed **868 new incoming members**.

### Nationalities

We are an open and diverse community with over **90 different** nationalities.

## OUR MEMBER COMPOSITION

As of today, our general member database boasts a total of 4,200+ general members. Last year we welcomed over 868 new members into our network and successfully hired 70 active members. Active members contribute directly to one of the eleven committees, with each committee being managed by one board member. As a collective, active members work collaboratively over one academic year to continue strengthening CSA position both today and in the future by offering a wide range of events and services to students.

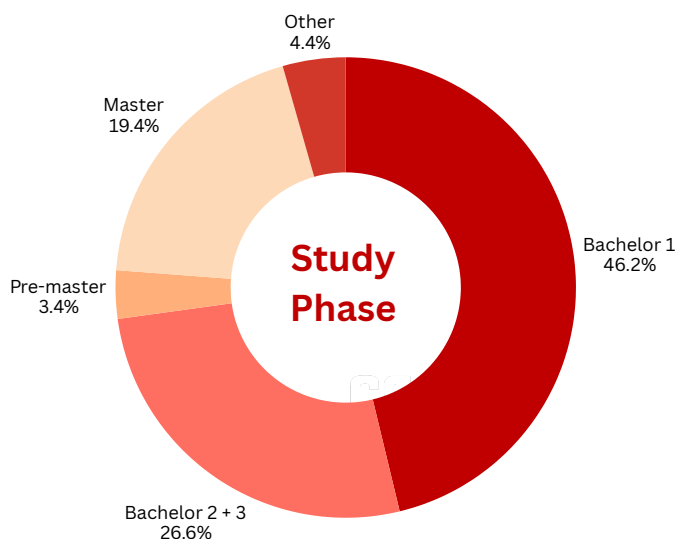

## WHAT MAKES US UNIQUE?

What makes CSA different from all other student associations in the Netherlands is without a doubt the diversity and closeness of our student network. Because we are not faculty-tied, we've been able to attract students into our network from a highly diverse range of nationalities, studies, and cultures, all of whom share an interest in the Chinese culture in one way or another. Furthermore, members and alumni of our association remain close to CSA even long after graduating, contributing to a continuous cycle of giving back. This has allowed our association to continue growing steadily over the past 20 years.

# CAREER DAYS 2026

## FLAGSHIP EVENT

While CSA has several flagship events, the longest-ongoing and most prominent one is the Career Days event. This event has one overarching purpose: to connect ambitious students and recent graduates with leading global companies. All formal events hosted by CSA are handled by the Career Events Committee, including but not limited to the Career Days event, company dinners and monthly career-related workshops.

The CSA Career Days provide companies a direct access to driven and talented students, bringing together a group that is eager to explore internships and full-time positions. By participating, companies not only increase their visibility among our network and at EUR overall, but also fill their open roles with individuals who are motivated and well-prepared to excel in the workforce. This mutual exchange of benefits will help both parties, ensuring that companies meet their recruitment goals while students take a step closer to their future careers at your company.

# CULTURAL ASSOCIATIONS

## NEW INITIATIVE

This year marks the start of a new initiative bringing together cultural associations across Erasmus University. These student-led communities celebrate cultural identity, create space for connection, and play an important role in fostering an inclusive university experience!
